Anyan's comments:
long time no see! It's FHS #33!

the (old) F-5 has shown her face for the first time!
The F-5's strange livery is not the Imperial Japanese Army battle flag, but rather the Sundowners.

The pattern that looks like the have submerged rising sun flag from the Imperial Japanese Army is the unique design of the VFC-111, formerly VF-111, a deep tradition from the World War II.

It's nothing like the Imperial Japanese Army flag, so you don't have to worry about why the Americans are flying one of the flags of fascism! ^^
Though it's not surprising if the uninformed make that connection -_-;;;

There has been recent talks about the blueprints of the PAK-DA. The rumors say that it may be a Flying Wing design, but it's gonna take at least 10 years until the PAK-DA is completely finished and ready to fly...

so I supposed we should all wait and see heehee
